

BROOKS SCHOOL ROAD TIMBER GUARDRAIL INSTALLATION

Drive Fishers is the City of Fishers' initiative to increase travel efficiency, improve connectivity and maintain the sanitary sewer and water infrastructure via innovative projects and a proactive approach to construction and maintenance.

Since 2012, Drive Fishers has completed traffic calming projects, sanitary and storm sewer projects, 29 resurfaced lane miles, 6.5 trails and sidewalks, and received more than \$20 million in grants, improving the infrastructure in Fishers while leveraging federal dollars to save money for the Fishers' taxpayers.

Infrastructure improvement projects contribute to long-term vitality of our community and increased economic development opportunities.

PROJECT SCOPE

Connectivity and accessibility are a top priority in Fishers, and as paths are continually paved throughout the city there are various safety precautions the Department of Engineering is working to install. One of those projects includes the installation of a timber guardrail on the west side of Brooks School Road between 116 Street and Fall Creek Road.

Weather permitting, installation of the guardrail will begin the week of January 12 and may affect traffic during the 30 day construction period. There will be lane restrictions during construction and flaggers will be on site to help direct traffic and ensure safety of motorists and construction crew.

Upon completion the guardrail will ensure safety of pedestrians and bicyclists using the path. The @DriveFishers Twitter account will provide more up-to-date information about the progress of construction over the next 30 days.

PROJECT OVERVIEW

PROJECT STATUS: IN PROGRESS

BID DATE: OCT. 2014

ANTICIPATED CONSTRUCTION PERIOD: 30 DAYS

DESIGN CONSULTANT: SPECIALTIES

ESTIMATED PROJECT COSTS: \$205,025 FEDERAL FUNDS

PROJECT BENEFITS:

- IMPROVED SAFETY FOR PEDESTRIANS AND BICYCLISTS ON THE PATH
