

NOT A FAN OF THE “NEW NORMAL”?

Help Fishers beat COVID-19 by reaching 85% vaccination rates so that we can get back to the things we love. The Fishers Health Department and the City of Fishers are challenging all residents to get vaccinated through walk-in appointments, or by scheduling in advance at ourshot.in.gov or by calling 2-1-1 or the Fishers COVID-19 Hotline at (317) 595.3211.

FACT 1 **THE COVID-19 VACCINE WILL NOT GIVE YOU COVID-19**

COVID-19 vaccines do not contain the live virus, so you can't contract the disease from the vaccine.

FACT 2 **RAPID DEVELOPMENT OF THE COVID-19 VACCINES DOES NOT MEAN THEY ARE NOT SAFE**

Significant scientific progress decades before the pandemic, in addition to collaboration among scientists around the world, made rapid development of the vaccine possible.

FACT 3 **THE VACCINES MAY PROVIDE PROTECTION AGAINST MORE THAN ONE STRAIN**

Like all viruses, SARS-CoV-2 (the virus that causes COVID-19) develops small mutations over time. Info shows that all available COVID-19 vaccines are effective against multiple strains currently in circulation.

FACT 4 **COVID-19 VACCINES WILL NOT CHANGE YOUR DNA**

Pfizer and Moderna COVID-19 vaccines use mRNA, which does not alter your DNA in any way. It triggers an immune response that produces antibodies, which protect you from getting infected.

FACT 5 **THERE IS NO EVIDENCE THAT THE VACCINES ARE LINKED TO INFERTILITY OR MISCARRIAGE**

In addition, the natural post-infection immune response to the COVID-19 virus, which the vaccine mimics, has not resulted in an increase in miscarriages or infertility.

FACT 6 **WE KNOW EXACTLY WHAT IS IN THE COVID-19 VACCINES**

All currently available vaccines have published the ingredients for the COVID-19 vaccines. Speculation that they contain microchips or tracking devices has been proven false.
